Message From The Chairman.....

COVID-19 THE PANDEMIC

The outbreak of the COVID-19 pandemic has staggered the world. It has become a major global crisis and has adversely affected every aspect of human life. Successively, four lockdowns have been imposed by the government in the country. Still there is no sign of the pandemic abating. It appears that we have to live with this uncertainty for some more time. Therefore, we must be prepared to combat this pandemic.

The last few days haven't been easy for anyone. The turn of events have reinforced certain human values within us: kindness, empathy, compassion, gratitude, resilience and most importantly self-sufficiency.

There have been significant reformations in the educational platform. The lockdown has digitized the system of education. Dynamic ways like e-learning, online examination, webinars, virtual labs etc. have been adopted for a free flow in imparting education.

Even the most advanced nations like America, Italy, Germany, Spain etc have failed to control the pandemic. The corona positive cases and the lockdowns are concurrently increasing. No vaccine has been invented yet and there is no medicine for the disease. So, we have to live with it for an unspecified period of time. We have to take the bull by the horns. The safety and wellbeing of everyone is of paramount importance. I hope that all the members of the synergy family stay safe and abide by the government guidelines to tide over the crisis. Certainly, there is light at the end of the tunnel.
