Message from The Chairman..... Helping Others : The Purpose Of Life

Happiness begins from the moment you do something for others. However, when doing so, we should not expect something in return; our intentions should be to lessen other people's misery. We often turn away those who seek help from us. But it is only natural that those who have should be approached by those who do not have. Acts of charity must be viewed as the right thing to do, rather than as acts that are performed with the goal of attaining something. A simple and short story of kindness can make us understand the act of helping and giving others who might be complete strangers to us. A man parked his car in front of the market and was waiting for his son to return with a few items from the supermarket, when he saw a tramp coming his way from across the road. From his looks, he had no home, no clean clothes, and no money. He hoped that he would ask him for some money but to his astonishment he did not. The tramp came and sat on the curb nearby and after a few minutes, he spoke "That's a very nice car, you have there" he said. He was ragged but he had an air of dignity around him.

He sat there quietly and the expected plea for money never came. Breaking the widening silence between them the man asked the tramp if he needed any help. The tramp answered in three simple but profound words that one can never forget. We often look for wisdom in great men and women and we expect it from those of higher learning and accomplishments. The three words of wisdom from the tramp that shook the man were "Don't we all?" he said. The man was feeling high and mighty, successful and important until those three words hit him like a shotgun. No matter how much we have, no matter how much we have accomplished, we need help too. No matter how little we have, no matter how loaded we are with our problems, we can give help. You never know when you may see someone that appears to have it all, are actually waiting on you to give them what they don't have. A very special form of giving takes the form of small, personal acts of kindness. Very often it is not money or belongings that people need, it's the things that can't be seen. Everybody has something of value for another person. It could be a kind word, a simple smile, some appreciation, the sharing of some special knowledge, even a helping hand or a bit of support during a difficult emotional time. The act of giving doesn't have to be limited to an exchange of presents only on special occasions. You can treat every person you come into contact with as someone who you can give a gift to. Indeed participating in shared tasks like community service, and other social activities, build social connections and supportive social networks, especially in these tough times of Covid -19 pandemic where we all are shut indoors with our own intricacies predicts how satisfied people are even after other factors are taken into account and can share their positivity. Matching our strengths to the right opportunities and sharing it for helping others during the coronavirus outbreak is a project -one that has real social benefits.

National Webinar on National Education Policy at Synergy, Dhenkanal

Synergy Institute of Engineering & Technology organised a webinar on “National Education Policy” on Monday, 26th April 2021. The experts invited as guest speakers for this event were Prof. (Dr.) Abhay Kumar, Vice Chancellor, Pratap University, Jaipur, Prof. (Dr.) Hiren Doshi, Pro Vice Chancellor, SAGE University, Indore, Dr. Jolly Masih, Head, Techno Managerial Research, Prestige Institute of Engineering Management and Research, Indore, Dr. Prathibha B S, Associate Prof. BNM Institute of Technology, Bangalore and Prof. Priyanka Tyagi, Lingayas Lalita Devi Institute of Management and Sciences, New Delhi. The expert speakers highlighted the following points: The policy seeks to restructure school curricula and pedagogy in a new ‘5+3+3+4’ design, so that school education can be made relevant to the needs and interests of learners at different developmental stages – a ‘Foundational Stage’ (five years), a ‘Preparatory Stage’ (three years), a ‘Middle Stage’ (three years) and the ‘High Stage’ (four years, covering grades 9, 10, 11 and 12). It aims to achieve ‘universal foundational literacy and numeracy’ in primary schools by 2025. For this, the Ministry of Human Resource Development shall set up a National Mission on Foundational Literacy and Numeracy. Public and private schools – except the schools that are managed, aided or controlled, by the central government – will be assessed and accredited on the same criteria, benchmarks, and processes. The Gross Enrollment Ratio from preschool to secondary education should be 100 per cent by 2030. (GER is defined as the ratio of the total enrolment in education – regardless of age – to the official population in a given school year, expressed as percentage.) The policy states that universal participation in schools shall be achieved by tracking students and their learning levels to ensure they are enrolled and attending school, and have suitable opportunities to re-join or catch up at school in case they have dropped out or fallen behind.
